## 🎓 Education

### Master's degree in CS, Computer and Information Systems Security

2023 – 2025

*FEI STU, Bratislava*

- › Courses like machine learning, cryptography, network encryption, parallel computing, distributed systems.
- › My [master thesis](#) focused on conversion of security policies between LSM in Linux kernel.

### Exchange student

2024 – 2025

*DTU - Technical University of Denmark*

- › Participated in a project designing digital document signing system, focusing on security and cryptography.
- › As a member of a group I wrote a literature review about S-Box construction techniques.

### Bachelor's degree in Applied Computer Science

2020 – 2023

*FEI STU, Bratislava*

- › Courses like OOP, OS, computer architecture, databases, web dev, abstract algebra or computer crimes.
- › For my bachelor thesis, I designed and created an IoT device for counting cyclists in traffic.

## 💼 Experience

### Teaching assistant

2024 – 2025

- › Tutoring students in course OOP, helping them with object-oriented paradigm and Java language.
- › Grading and evaluating student assignments and presentations.

### CSIRT Knowledge Engineer

2023 – 2024

- › Part of a team in charge of intelligence base in our faculty's CSIRT.
- › Collecting resources and creating a knowledge base and internal policies for use in CSIRT.

### Periodical publications deliverer

2018 – Present

- › Collecting and organizing newspapers and magazines.
- › Creating delivery route and delivering publications to customers.

## ⚙️ Skills

**Tools** ELK Stack, BurpSuite, Wireshark, BinaryNinja, GDB, pwntools, Nmap, Autopsy, Windows Active Directory, Microsoft Sentinel

**Languages** Slovak (Native), English (C1), German (A2) - Python, Java, C/C++, JavaScript, PHP

## ☀️ Certifications

**Cyber Heroes Academy (Binary Confidence)** Blue teaming, Incident response, forensics, threat hunting, ELK Stack, Wazuh, OWASP ZAP

**Ethical Hacker (Cisco Networking Academy)** Pentesting, exploiting applications, social engineering, vulnerability scanning, reporting, vulnerability assessment

## 🧪 Labs

**HomeLab(RPi 4 debian based server)** Syncthing, password manager hosting, VPN for remote access, PiHole DNS server, Crafty server hosting, FreshRSS hosting, Nextcloud, Cockpit,

**Azure Sentinel Training Lab** SIEM, incident management, threat intelligence/hunting, analytics rules, Kusto Query Language

**TryHackMe training** Red Team Fundamentals, Security Operations, Incident Response, malware analysis, OS security, networking, cyber defence frameworks, threat intel
