

Bc. Samuel Sirota

Student in computer science at STU

@ samo.sirota4@gmail.com

+421 911 557 599

EXPERIENCE

Teaching assistant

I tutor and help students in course Object Oriented Programming, they learn object-oriented paradigm and use Java programming language.

2025 -
Bratislava

Periodical publications delivery

Everyday I delivered newspapers and magazines to set number of places.

2018 - 2024
Bratislava

CSIRT Cyber-security Knowledge Engineer

I was part of the team in charge of intelligence base inside our faculty CSIRT. We collected knowledge base which we also used to teach new members..

2023 - 2024
Bratislava

EDUCATION

Exchange student

Focusing mainly on cybersecurity and group projects

2024 - 2025
DTU -
Technical University of Denmark

Master's degree in computer science

I focus on cybersecurity, operating systems security

2023 - ETC 2025
STU in Bratislava

Bachelor's degree in computer science

My bachelor thesis was about using IT for counting cyclists

2020 - 2023
STU in Bratislava

ABOUT ME

Age: 24 years old
Interests: hiking, running

" We only lose when we give up. "

LANGUAGES

Slovak C2* Native
English C1* proficient speaker
German A1* elementary

MS suite advanced user
Python

VOLUNTEERING

Camp Counselor - Every summer I organize children's camp. At the end of the camp we start preparing for the next years camp, we manage logistics, schedule for the week, make the promotional materials and graphics. In the summer we come to location for a week. We entertain the children, play games with them, teach them things, go on a trips.

2018 - present

Live Sound Engineer - I setup, do maintenance, edit and mix live audio our choir. We work mainly at holy mass but also at certain events organized by them

2023 - present

SKILLS

Network Security

- Implementation of security protocols (TLS, IPSec, VPN) to protect network communication.
- Configuration and management of firewalls (e.g., iptables) and intrusion detection and prevention systems.
- Analysis of network traffic using tools such as Wireshark and tcpdump to identify potential threats.

Cryptography and Secure Protocols

- Implementation of cryptographic algorithms, such as AES, RSA, and SHA, for data encryption and authentication.
- Design and evaluation of the security of communication protocols (e.g., HTTPS, SSH).
- Study of post-quantum cryptographic methods and their potential integration into existing systems.

Operating System Security

- Identification of vulnerabilities in operating systems (Linux, Windows).
- Hardening OS: removing unnecessary services, configuring SELinux/AppArmor/Tomoyo, securing access rights.
- Study of malware and techniques such as rootkits and ransomware, and design of countermeasures.

Web Application Security

- Analyzing vulnerabilities according to OWASP Top 10 standards (e.g., SQL Injection, XSS, CSRF).
- Testing and fixing security flaws in student and open-source projects.
- Working with tools such as Burp Suite, OWASP ZAP, and Nikto.

Incident Response and Digital Forensics

- Preparation for handling security incidents, including attack identification, evidence collection, and system recovery.
- Basic analysis of logs and incident records.

Penetration Testing

- Using tools such as Metasploit, Nmap, and Hashcat to identify vulnerabilities and assess system security.
- Simulating attacks in test environments to enhance protection.

Self-Education in Cybersecurity

- Completed courses on platforms such as TryHackMe, Hack The Box, and picoCTF.
- Participated in Capture the Flag (CTF) challenges to solve real-world cybersecurity challenges.
